

CAEB AGROENERGY

SOLUTION FOR THERMO-VALUING VINEYARD TRIMMINGS AND PRUNINGS

CAEB AGROENERGY APP

MOBILE APPLICATION FOR THE ENERGY VALORISATION OF AGRICULTURAL PRUNING RESIDUES

HOW MUCH ENERGY I HAVE IN THE FIELD

- Enter the hectares of your crops to get **an estimate of the energy you can gain** from your pruning remains.
- The App calculates the **total covered area** you can warm **expressed in m² or m³**.

HOW MUCH I CAN HEAT UP

- Enter the m² of residential buildings, the m³ of industrial buildings and the m² of the greenhouses you want to heat up.
- After selecting the available crops, the App **determines the field surface** needed to meet the previously estimated energy needs.

HOW MUCH I CAN SAVE

- **Enter the costs you usually pay** for warming with traditional fossil fuels like Diesel oil, LPG or natural gas.
- You get an estimate of the **crop surface necessary** to generate the same amount of thermal energy and also an estimate of the **savings** you get for not purchasing traditional fossil fuels.

MY ENERGY BALANCE

- In this section you can enter your company data and replace some standard parameters with others more related to your farm.
- The **energy balance** you will get **will be tailored to you**.

THE SOLUTIONS

- In this section CAEB INTERNATIONAL suggest their **solutions for collecting pruning remains and valuing their energy content**.

DOWNLOAD THE APP FROM "GOOGLE PLAY" AND "APP STORE" USE THE KEYWORDS **CAEB AGROENERGY**
